

## CALL FOR PAPERS

NATURAL RESOURCES RESEARCH SPECIAL ISSUE ON

### *Data Analysis Tools for Mineral Potential Mapping*

**Guest Editors:**

Mark Mihalasky (United States Geological Survey)

Vesa Nykänen (Geological Survey of Finland)

It has been nearly three decades since the first widely read and cited papers on mineral potential mapping were published by Graeme Bonham-Carter, Frits Agterberg, and their group at the Geological Survey of Canada and University of Ottawa. This special issue in Natural Resources Research (NRR) journal would take stock of how far we have progressed in the field since that time, identify key issues, and determine future directions. We have in mind about 10-15 papers from high-quality presentations in IAMG2018. The subject of this special issue is of topical interest to both academicians and industry practitioners. We consider NRR to be the most appropriate journal for this subject because of the vast (and growing) audience of the journal, especially now that it is covered by the Science Citation Index Expanded (also known as SciSearch®) and the Journal Citation Reports/Science Edition, and that it has recently received its astounding first Impact Factor of 3.094. Moreover, the theme of this special issue is strongly relevant to the aims and scope of the journal.

**Timelines:**

- Paper submission before: **December 31<sup>st</sup>, 2018**
- Return of reviews to authors before: **March 31<sup>st</sup>, 2019**
- Submission of final papers deadline: **June 30<sup>th</sup>, 2019**
- Publication in the Autumn or Winter 2019

**Submit Papers** on-line through the journal's website

<https://narr.editorialmanager.com/>

When submitting you must choose the SI: "Mineral Potential Mapping".

Submitted manuscripts must fully comply with the journal's Instructions for Authors (see:

<http://www.springer.com/journal/11004>) in preparing manuscripts.
